Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application

Reasons for comment:

Comments:	The proposal for a loft conversion at number 15 Hopewell Drive will have a dramatic impact on the solar panels of our house [REDACTED] Hopewell Drive this will have a shadowing effect all year round to the solar panels on the rear of our property which because of orientation these panels produce 2/3 of our solar production we also have panels on the front of the building that will not be affected, because of orientation they are not so. Productive. The shadowing effect will be at his worst in the winter months when the sun is low, but as I said, we'll have an effect all year round. our solar panels have not been imposed on our neighbours as the panels were there approximately two years before they purchased the property. there have been several High Court judgements in Kent and Medway loss of light for a neighbours solar panels is a planning consideration for the local authority on climate change grounds.. if needed, we can instruct a company such as ANSTEY Horne who are specialists in this field. if you need any clarification information, please don't hesitate to contact us. Will be happy to answer all questions as well as we can. Kind regards, [REDACTED]
