Reasons for comment:

Comments:	<ul style="list-style-type: none"><li>- The proposal represents an inappropriate form of development within the Green Belt and in the absence of any special circumstances would by its inappropriateness have a harmful impact on the open, rural and an adverse effect on the visual amenity of the area.</li><li>- The proposal will involve significant additional vehicle movements on and off the main highway A227 Wrotham Road and Longfield Road at the same area of a special SEN school. The access to the proposed site will add further to local resident's anxiety over highway safety particularly as Longfield road is already a very busy and dangerous road for both drivers and pedestrians. Efforts to control speed limits have been ineffective and the proposed development will exacerbate the situation.</li><li>- The site is high grade farming land and has been farmed for many years to produce food and should be protected from development as food production for the country is becoming a major issue.</li><li>- The infrastructure, particularly with regards to the roads in and around Meopham, cannot support any further significant development such as in this application. Already in the event of a problem on the A227 road the whole area becomes grid locked as the local village side roads are totally inadequate to support the traffic.</li></ul>
