Reasons for comment:

Comments:	This is a piece of land which has no evidence of any structure having ever being on it. The land is a habitat of several species of bats, a run through for badgers and foxes. There are also several species of owls in the area including tawny and barn. Further, we have seen evidence of snakes crossing over into our pathway. This land has not been coppiced, looked after or supported for at least the four years that I have resided here. Moreover, the space which is proposed is narrow and would not be appropriate for a large building which is proposed. I strongly oppose this being built upon as it would have a fundamental impact on the trees, wildlife and the neighbors that already reside there.
