Reasons for comment:	
Comments:	Wrotham Road, particularly in this area, cannot handle the current flow of traffic, especially during the hours of 7:30-9am and 2:30-4pm. The road is backed up with traffic for approximately 1 mile, sometimes more, on the approach to Meopham secondary school from the Meopham parade. Rather than considering the individual developments, the developments should be considered as a whole, as they will all be using Wrotham Road to access the motorways and beyond. So adding in the region of 1000+ homes to Istead Rise and Meopham would create considerable traffic issues adding to already congested roads. If 156 houses on the Rose Farm development would create 76 extra car movements during peak times, then 1000 homes would create around 500 extra movements! It would take an extra hour or more to travel from Istead to Meopham during peak times! That's ridiculous when trying to get children to school or go to work. It should be a 7 minute journey! The pollution would be substantial from cars being bumper to bumper for miles twice a day!

Kind regards
