For the attention of Richard Hart – Prior Approval Application

Dear Richard,

PP-11188608

Please see the Prior Approval Application for a proposed new building at Grove Farm, Higham, ME3 7NX.

I have stated that the total area of the agricultural unit is 44 hectares which is the approximate size of Grove Farm. I have also attached a plan showing the boundaries of Grove Farm. We farm a number of units, mostly within 6 miles of Grove Farm within the Medway area and another further away. The total area of our farming operation comes to about 500 hectares.

My answer to the question about how long the land has been used for agriculture is 80 years which is how long our family has been farming it since my father took it on in 1942. But in reality it has probably been used for agriculture since humans have been farming.

The site can be seen from a public footpath approximately 25 metres away. This runs up the farm entrance road and onward to the top of Telegraph Hill.
