Reasons for comment:

Comments: Dear Case Officer

I object to this application on grounds that the conversion will not have the local residents interest at all not the public's. If anything this only create more conflict by inviting non local residents in to area where they no reason to be in, with the possibility of only setting the ingredients for anti social behaviour. Further this will increase parking issues on a road with limited space. The planned community centre and academy will only provide services and support for people of one faith which is not related to the local residents at all not does have their interest. There is already one academy and community within off St Gregory Crescent what would possibly be the need for another for a small number of community, especially if they don't been live near the proposed site. It will also create more traffic in residential area. Why make of the wide available units at the St Georges centre which ample parking, access and it takes traffic away from the already busy residential area. With it being a community centre/ food bank/ academy it only create more congestion, assuming it will a kitchen which will only create population than the previous establishment, and a breeding ground more rodents. This only makes the local residents feel uncomfortable, insecure and increase anxiety with non local residents to congress and possibly create conflict and further demands

The application for ground floor conversion should to a communit/foodbank/academy should not be allowed. Instead consider a different type of service or business that would more suited and beneficial to the local residents and local members of the public, hence that would increase employment. Example a support centre for men/women suffering with domestic abuse/violence, mental health etc

Kind regards
