Reasons for comment:

Comments:	There has already been a petition against the location of this operation. It attracted objections from 480 local people (Petition · Stop Gold Street Winery - United Kingdom · Change.org). The proposed construction is inappropriate due to the obvious visual location of the steel shed, the disturbance from unconsidered noise associated with bottling, increased traffic to, from and around the site, and access to it that results in the maximum loss of tranquillity and effects a major change in the character of the area compared to alternative locations - where the harm would be certainly be less and attention would not be drawn to it. Location: It is positioned at the highest point and so most visible of all locations on the 28 acre site and will be seen from Greenlands, Sole Street and Gold Street. During a meeting with representatives from the Parish Council, Mr Sengupta and his wife indicated a big reason for locating the building at this site is because 'of the view'. This means it is most obviously prominent hence it damages the landscape the greatest. Due to permitted development and the allowance of a barn, I believe tucked down in the eastern end of the field is the most acceptable location, away from the prominent location and our valued public landscapes, as this would lessen damage to the enjoyment of the National Landscape. The site would generate a substantial amount of noise, as bottling is extremely noisy.
-----------	---

The local roads are highly inappropriate for HGVs and an increase in traffic to the site.

Kind regards
