

As per our telephone conversation this afternoon, please see below the issues regarding the fence in this matter.

The fence appears to be very high and wide and needs to be modified away from the kerb, as it is obscuring the vision of oncoming traffic and the corner of the fence near to the car park is also obscuring peoples vision getting out of the car park, as we can not see oncoming traffic, which is also the same issue when parked outside [REDACTED] Winters Croft. You also can't see when pulling out of there, as you can not see any traffic coming as the fence is totally obscuring your vision completely and is very dangerous.

Since this fence has gone up, all we seem to hear now is people hooting their car horns at each other, because someone has pulled out on them (which isn't there fault when they can't see). I do feel this is an accident waiting to happen.

Regards

[REDACTED]
