Please find attached the still shots taken on Gold Street, Henley Street and Batts Road this was due to the A2 closure. Unfortunately, when the A2 has an incident, which is a regular occurrence the satellite navigation systems direct cars, lorries and vans through our lanes. Today a coach made its way down Gold Street only to get stuck and have to reverse all the way back.

Please may I ask you to take a look at these still shots. I do also have numerous videos too of this morning's chaos, if you would like to see them and review, please let me know.

If the above mentioned planning application is approved these lanes will be congested daily with Cobham house Vineyard traffic.

May I also add if the proposed access on the blind bend on Gold Street is granted, this would no doubt contribute to more accidents. Our lanes are regularly used by walkers, horse riders and cyclist and to invite another business that will invariably have machinery and lorries seems a very dangerous future indeed.

Permitted development includes ancillary activities such as weddings which attract 250 people. Indian weddings can increase to 400 to 500 people. Pedestrians using the PROW will be endangered too.

I fully appreciate there is a lot to consider, but please consider all of the above, the objections and our reports.
