Stance: Customer objects to the Planning Application

---

Reasons for comment:

Comments: Dangerous access on busy main roads and small side roads.  
The activity will also likely result in increased emissions and release of substances that could be harmful for a prolonged period of time next to a school (developing lungs etc).  
High grade agricultural land, long term usage for food production.  
Already high congestion- recent road works have evidenced the high impact any disruption in this network has. Side roads are not adequate to support any diversions and are not large enough for heavy vehicles.  
Negative impact of new developments on the village identity.  
Local infrastructure is already at capacity - difficulties getting GP appointments, inadequate local services, need to stand at peak times from Meopham station, almost non existent bus options and no longer any coach commute options.  
These plans overall plan an increase in population of Meopham by around one third, unreasonable request to the local communities who have already seen development in the Gravesham area.

---

Kind regards
