Dear Sir/Madam,

Planning Application comments have been made. A summary of the comments is provided below.

Comments were submitted at 18/12/2025 5:40 PM from [REDACTED]

Application Summary

Address: Nuralite Industrial Estate Canal Road Higham Rochester Kent ME3 7JA

Proposal: Application for removal of condition 4 ,6,12 and variation of condition 7 attached to 20190290 - The proposal is for the systematic redevelopment of the existing Nuralite site. This includes the importation of inert materials to cap, and landscape the historic asbestos landfill, thus containing its contamination risk. To demolish the existing buildings of the Nuralite industrial estate, deal with existing contamination, both through capping and removal of areas of hydrocarbon pollution, the laying of new service and utility infrastructure and the construction of 11 new purpose built light industrial type units and a site office; to allow removal of passing places, temporary traffic controls, Archaeological works and implementation of a permanent TRO for all traffic.

Case Officer: Mr Richard Hart

Reasons for comment:

Comments: As the father of a 3 year old autistic child who lives on Chequers Street, I am exceptionally concerned of the impact even more traffic will have on young families. There has already been an unacceptable increase (far beyond those previously estimated) in traffic over the last couple of years. This has placed an unmanageable strain on residents, the local environment and, most worryingly, increases the prospects of accidents on roads which were not built to accommodate this level traffic. Any increase in traffic that a larger site will attract, is an accident waiting to happen. It's worth noting, that even though commercial traffic is told to avoid it, I regularly see lorries going past the local primary school - that is a tragedy waiting to happen.

Kind regards
