Application Summary

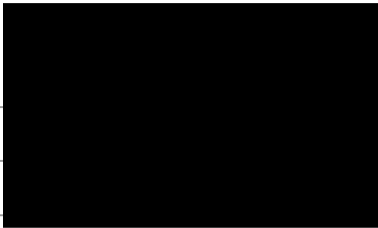

Address: Nuralite Industrial Estate Canal Road Higham Rochester Kent ME3 7JA

Proposal: Application for removal of condition 4 ,6,12 and variation of condition 7 attached to 20190290 - The proposal is for the systematic redevelopment of the existing Nuralite site. This includes the importation of inert materials to cap, and landscape the historic asbestos landfill, thus containing its contamination risk. To demolish the existing buildings of the Nuralite industrial estate, deal with existing contamination, both through capping and removal of areas of hydrocarbon pollution, the laying of new service and utility infrastructure and the construction of 11 new purpose built light industrial type units and a site office; to allow removal of passing places, temporary traffic controls, Archaeological works and implementation of a permanent TRO for all traffic.

Case Officer: Mr Richard Hart

Stance: Customer objects to the Planning Application

Reasons for comment:

Comments: This must be of the most stupid suggestions. Clearly not asked any residence in the area or surrounding areas of how this would impact their lives, general commute and traffic in the area. If there's an accident on the B2000 the traffic has nowhere to go if this is a one-way, people won't be able to get to the train station.

Kind regards
