Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	Hi, I have chose to object this permission as I don't agree with how the rear parking will work. As firstly the rear access road is totally blocked with overgrowth. Secondly rear access is restricted with gates due to crime and unauthorised access this was done in agreement with all property owners.....This would need to be kept in place if the rear access road was going to be used for parking at the rear for the above property, and the gates properly closed and locked. I would also feel if the rear access road is going to be used for parking for the above property, and as the rear access road will be much more used it should also be properly maintained, and I would agree to maintain my patch long as a full clean up was done of all of the rear access road that was going to be used and then all residents advised to do there own patches. I personally feel the front is where the parking should be allocated not the rear, unless a complete clean up of the overgrowth is included.

Kind regards
