Reasons for comment:

Comments:	My family and I object against this significant build for several reasons: -The additional drop down kerb will take away 2/3 parking spaces away in a road where there is limited parking already and there are too many drop down Kerbs after KCC dropped several others during their resurfacing of the pavements last year. In addition, the drop down kerb is not necessary if they are not putting in a drive. The plans just show grass at the front of their property. Number 21 and 23 next door already have a drop down kerb across the entire front of their houses. This would make one huge drop down kerb from 21 all the way along to 27 (27 have a drop kerb too). People are now parking on the corners of roads now making it dangerous for pedestrians and road users. This additional drop down kerb will make this situation worse. -This part of cirrus crescent is already very over crowded and this huge build will add to this over crowding. Disrupting neighbours view of the sky and green spaces in the surrounding area. -There is a building site already opposite which will create even more disruption, noise and road congestion in the area. This is harmful for the environment and public health. -This build encroaches significantly on number 27 which impacts their privacy and views of the sky. -This build will impact the aesthetics of the estate and does not keep with the original plans. -The build is bulky and unbalanced, not keeping with the types of buildings already in place.
