Application Summary

Address: Nuralite Industrial Estate Canal Road Higham Rochester Kent ME3 7JA

Proposal: Application for removal of condition 4 ,6,12 and variation of condition 7 attached to 20190290 - The proposal is for the systematic redevelopment of the existing Nuralite site. This includes the importation of inert materials to cap, and landscape the historic asbestos landfill, thus containing its contamination risk. To demolish the existing buildings of the Nuralite industrial estate, deal with existing contamination, both through capping and removal of areas of hydrocarbon pollution, the laying of new service and utility infrastructure and the construction of 11 new purpose built light industrial type units and a site office; to allow removal of passing places, temporary traffic controls, Archaeological works and implementation of a permanent TRO for all traffic.

Case Officer: Mr Richard Hart

Reasons for comment:

Comments: As a regular user of these narrow lanes which all ready have very large Lorry's some of which drive much to fast. The b2000 is already an over busy road with lorry's that only just have room to pass each other. Adding even more lorry's and also cars to an over busy road is just an accident waiting to happen. It is just not suitable for anymore heavy vehicles

Kind regards
