Application Summary

Address: Nuralite Industrial Estate Canal Road Higham Rochester Kent ME3 7JA

Proposal: Application for removal of condition 4 ,6,12 and variation of condition 7 attached to 20190290 - The proposal is for the systematic redevelopment of the existing Nuralite site. This includes the importation of inert materials to cap, and landscape the historic asbestos landfill, thus containing its contamination risk. To demolish the existing buildings of the Nuralite industrial estate, deal with existing contamination, both through capping and removal of areas of hydrocarbon pollution, the laying of new service and utility infrastructure and the construction of 11 new purpose built light industrial type units and a site office; to allow removal of passing places, temporary traffic controls, Archaeological works and implementation of a permanent TRO for all traffic.

Case Officer: Mr Richard Hart

Stance: Customer objects to the Planning Application

Reasons for comment:

Comments: I strongly object to the proposal as this will push more lorry's onto the B2000 when it is already a route for several businesses that already use this route for lorry's. Also local residents use higham station this will mean additional time and inconvenience to get to the station. It would be much more practical for lorry's coming from higham to use the Gravesend road instead of the B2000 which has problems already with lorry's and bus/lorry's passing each other. Also we have the addition of works vehicles of all shapes due to the esquire development. I think the villages of Cliffe/Cliffe woods have need a bit more considering instead of these companies

Kind regards
