Application Summary

Address: Nuralite Industrial Estate Canal Road Higham Rochester Kent ME3 7JA

Proposal: Application for removal of condition 4 ,6,12 and variation of condition 7 attached to 20190290 - The proposal is for the systematic redevelopment of the existing Nuralite site. This includes the importation of inert materials to cap, and landscape the historic asbestos landfill, thus containing its contamination risk. To demolish the existing buildings of the Nuralite industrial estate, deal with existing contamination, both through capping and removal of areas of hydrocarbon pollution, the laying of new service and utility infrastructure and the construction of 11 new purpose built light industrial type units and a site office; to allow removal of passing places, temporary traffic controls, Archaeological works and implementation of a permanent TRO for all traffic.

Case Officer: Mr Richard Hart

Stance: Customer objects to the Planning Application

Reasons for comment:

Comments: Making higham station to b2000 a one way system would be unbearable I absolutely and utterly object to this. When there are problems or qccidents on b2000 this route can be used to circumnavigate and continue journeys seamlessly (unlike Medway) the roads are used by cyclists and horses and having more heavy goods traffic on these roads poses a serious risk to rural businesses and equine yards and would seriously put pressure on people's pockets on extra petrol and costs travelling to and from cliffe/ Gravesend . I travel daily to see my mother using chalk and higham to get to cliffe and back again. It is a superb journey that is uncomplicated and unhindered. Basically if you want to make an industrial site put in the infrastructure as it's serving only the councils pockets and in no way helping the rural community. We are all vehemently opposed to the proposal to interfere with the roads in higham. We do not want the problems that Medway roads have. Basically if it ain't broke don't try to fix it. After the millions spent on the cycle path putting more hgvs on these roads poses cycling routes is ridiculous and shows a total disregard to public spending and planning . I cannot find anyone who is in favour of further industrialising the

morality are . We would rather you just left things as they are and let this amazing historic piece of dickens countryside as was . Stop industrialising out beautiful villages

Kind regards
