Dear Sir/Madam,

**Proposal:** Demolition of existing bungalow and erection of two storey dwelling with rooms in the roofspace, erection of outbuilding in rear of garden to form a gym, erection of bin store to front, alteration of existing frontage to create hard standing for parking, new boundary including existing access.

**Site:** 20231001: - 232 Singlewell Road, Gravesend, Kent, DA11 7RE.

Thank you for your letter dated 09 October 2023.

Southern Water requires a formal application for a connection to the public foul sewer to be made by the applicant or developer.

To make an application visit Southern Water's Get Connected service: [developerservices.southernwater.co.uk](https://developerservices.southernwater.co.uk) and please read our New Connections Charging Arrangements documents which are available on our website via the following link: [southernwater.co.uk/developing-building/connection-charging-arrangements](https://southernwater.co.uk/developing-building/connection-charging-arrangements)

Please note: There is a private communication pipe within the development site.

The supporting documents make reference to drainage using Sustainable Drainage Systems (SuDS).

Under certain circumstances SuDS will be adopted by Southern Water should this be requested by the developer. Where SuDS form part of a continuous sewer system, and are not an isolated end of pipe SuDS component, adoption will be considered if such systems comply with the latest Design and Construction Guidance (Appendix C) and CIRIA guidance available here:

[water.org.uk/sewerage-sector-guidance-approved-documents/](https://water.org.uk/sewerage-sector-guidance-approved-documents/)

[ciria.org/ItemDetail?iProductCode=C753F&Category=FREEPUBS](https://ciria.org/ItemDetail?iProductCode=C753F&Category=FREEPUBS)

Where SuDS rely upon facilities which are not adoptable by sewerage undertakers the applicant will need to ensure that arrangements exist for the long-term maintenance of the SuDS facilities. It is critical that the effectiveness of these systems is maintained in perpetuity. Good management will avoid flooding from the proposed surface water system, which may result in the inundation of the foul sewerage system.

Thus, where a SuDS scheme is to be implemented, the drainage details submitted to the Local Planning Authority should:

- Specify the responsibilities of each party for the implementation of the SuDS scheme.
- Specify a timetable for implementation.
- Provide a management and maintenance plan for the lifetime of the development.

This should include the arrangements for adoption by any public authority or statutory undertaker and any other arrangements to secure the operation of the scheme throughout its lifetime.

The Council's Building Control officers or technical staff should be asked to comment on the adequacy of soakaways to dispose of surface water from the proposed development.

It is possible that a sewer now deemed to be public could be crossing the development site. Therefore, should any sewer be found during construction works, an investigation of the sewer will be required to ascertain its ownership before any further works commence on site.

For further advice, please contact Southern Water, Southern House, Yeoman Road, Worthing, West Sussex, BN13 3NX (Tel: 0330 303 0119).
