Application Summary

Address: Nuralite Industrial Estate Canal Road Higham Rochester Kent ME3 7JA

Proposal: Application for removal of condition 4 ,6,12 and variation of condition 7 attached to 20190290 - The proposal is for the systematic redevelopment of the existing Nuralite site. This includes the importation of inert materials to cap, and landscape the historic asbestos landfill, thus containing its contamination risk. To demolish the existing buildings of the Nuralite industrial estate, deal with existing contamination, both through capping and removal of areas of hydrocarbon pollution, the laying of new service and utility infrastructure and the construction of 11 new purpose built light industrial type units and a site office; to allow removal of passing places, temporary traffic controls, Archaeological works and implementation of a permanent TRO for all traffic.

Case Officer: Mr Richard Hart

Stance: Customer objects to the Planning Application

Reasons for comment:

Comments: The TPO for one way traffic will cause major problems when there is an accident on the B2000 or A289 as the route is only one to Cliffe & Cliffe Woods. Also many people from Cliffe Woods/Cliffe use this road to drive towards Gravesend during rush hour to avoid the A2. The B2000 already has too many lorries on it causing issues so this will cause more accidents as there will be more traffic overall. I object to this proposal

Kind regards
