

Pedunculate oak Tree ID #1

2 The Ridgeway

Tree Details	
Common Name:	Pedunculate oak
Scientific Name:	Quercus robur
Tree Height [m]:	16
Life Stage:	Mature
Physiological Condition:	Good
Structural Condition:	Good
Comments:	Large diameter (>50mm) snapped hung up branch above the informal footpath at six metres above ground level on the south eastern side of the trees canopy. The tree has multiple large diameter dead branches scattered throughout its canopy all of which are considered to pose an acceptable risk to users of the site and are highly valuable in terms of their ecological value and should be retained.
Recommendations:	Remove the snapped, hung up branch.
Priority:	Priority 2 - 3 months
