

20250318 Garage Site Adjacent To 33 Empress Road

KCC Heritage 6.6.25

Thank you for consulting us on this application.

The site is within an area of multi-period archaeological potential but historic mapping records that it was the site of a quarry in the 19th century for either sand and/or chalk. As a result of the likely removal of any archaeological deposits during quarrying, I consider it unlikely that development of the site would have a significant below-ground archaeological impact and therefore have no further comments to make in this case.
