

Supporting Documents Statement

As the proposed works are limited to essential repairs and maintenance, we will not be making any alterations to the building's design, layout, or use. Therefore, we do not believe that documents such as plan drawings, a design and access statement, or a heritage statement are necessary in this instance.

However, if there are any specific details you require to process the application, please let us know, and we will be happy to provide further information.

Regards,

Ravinder Bassi
