Reasons for comment:

Comments:	<p>Severe highways impact and network capacity. A single set of traffic lights can already impact wrotham road, causing an hours delay in getting to work or school.</p> <p>Negative impact on road safety - an already been wrotham road will increase risk with additional housing a building. Lengthen crossing for pedestrians and school children.</p> <p>Loss of green land and environmental harm</p> <p>This site is currently contributing to rural character, landscape setting and biodiversity. Development would erode the openness and separation. Loss of permeable land elevates surface water and flood risks and worsens heath and air quality for residents and wildlife will decline.</p> <p>On highways a transport grounds alone, residual cumulative impacts would be severe but not on that the proposal would also cause unjustified loss of greenfield land.</p>
