

The smell from them is intolerable they stalk me and harass me constantly
They use the fire exit to look into my property I got recordings of the staff bending there
knees to get a better view in to my lounge downstairs
They are already living there illegally and have had many migrants staying there
harrasing me constantly

I can't walk out in the garden anymore 😬 can't open doors or windows 😬 can't go out
without being harassed by pappa jhons staff and people on the other side no 28 on the
illegal staircase banging there plates and stalking me behind the curtains

I no it sounds far-fetched but I've lived with it for the last 12 years

Pappa jhons owner tried to kill me I'm lucky to be alive

If you let them live next door to me it will put my live in danger as they are hell bent on
destroying me

I've got a case against them and visa versa this is coming to an end soon

I can't handle any more disturbance like when they were living there illegally with the
knowledge of the council

They bang on walls stay up all night shouting on the phones and making sure there's
rubbish surrounding me

They say they don't care all the business is online and delivery

I got recordings of them harrasing me on the fire exit saying they live there are they
paying council tax ??

They had migration officers there 5 times now not the kind of people you want living next
door 😬 they also had a pedophile living there harassing me and the neighbours on
other side for years never paying council tax 😬
