

Application: 20231221

**TOWN AND COUNTRY PLANNING ACT 1990
THE TOWN AND COUNTRY PLANNING (DEVELOPMENT MANAGEMENT PROCEDURE)
(ENGLAND) ORDER 2015 (AS AMENDED)**

NOTIFICATION OF GRANT OF PERMISSION TO DEVELOP LAND
--

To: **Mr Adam Thompson
C/O Ms Joanna Loizou, OPEN Architecture
Anton House
South Park
Sevenoaks
TN13 1EB**

TAKE NOTICE that the **GRAVESHAM BOROUGH COUNCIL**, the Local Planning Authority under the Town and Country Planning Acts, has **GRANTED PERMISSION** for development of land situate at:

**Brimsole Farm
Brimstone Hill
Meopham
Gravesend
Kent**

and being **Conversion of existing agricultural barns into two 3 bedroom dwellings, with associated car ports, garden and landscaping.** Your application dated 1st December 2023 is permitted subject to the following:-

1. The development hereby permitted shall be begun not later than 3 years following the date of this permission.

Reason: In pursuance of Section 91 of the Town and Country Planning Act 1990, as amended by Section 51 of the Planning and Compulsory Purchase Act 2004.

2. The development hereby permitted shall be carried out in accordance with the following approved plans and particulars:

Application form
Barn 1 Existing Elevations
Barn 1 Existing Plans
Barn 2 Existing Elevations
Barn 2 Section, Plan and Photos
Drawing no. E002 (Site Location Plan)
Drawing no. E052 (Existing Car Port Elevations)
Drawing no. P150 (Proposed Site Plan)
Drawing no. P200 (Proposed Floor Plans)
Drawing no. P450 (Proposed Elevations)
Drawing no. P451 (Proposed Car Port Elevations)
Drawing no. C160 (Phasing Plan)
Design and Access Statement
Preliminary Ecological Appraisal
Structural Assessment of Brimsole Farm (Feb 2023)

Reason: For the avoidance of doubt and in the interests of proper planning.

3. No development shall take place prior to a contaminated land assessment (in accordance with the CLEA guidelines and CLR 11 methodology) and if necessary an associated remedial strategy, together with a timetable of works, being submitted to and approved in writing by the Local Planning Authority.
- a) The contaminated land assessment shall include a desk study to be submitted to the Local Planning Authority for approval. The desk study shall detail the history of the site uses and propose a site investigation strategy based on the relevant information discovered by the desk study. The strategy shall be approved by the Local Planning Authority prior to investigations commencing on site.
 - b) The site investigation, including relevant soil, soil gas, surface and groundwater sampling, shall be carried out by a suitably qualified and accredited consultant/contractor in accordance with a Quality Assured sampling and analysis methodology.
 - c) A site investigation report detailing all investigative works and sampling on site, together with the results of analysis, risk assessment to any receptors and a proposed remediation strategy shall be submitted to the Local Planning Authority. The Local Planning Authority shall approve such remedial works as required prior to any remediation commencing on site. The works shall be of such a nature so as to render harmless the identified contamination given the proposed end-use of the site and surrounding environment including any controlled waters.
 - d) Approved remediation works shall be carried out in full on site under a quality assurance scheme to demonstrate compliance with the proposed methodology and best practice guidance). If during any works contamination is encountered which has not previously been identified then the additional contamination shall be fully assessed and an appropriate remediation scheme agreed with the Local Planning Authority.
 - e) Upon completion of the works, this condition shall not be discharged until a closure report has been submitted to and approved by the Local Planning Authority. The closure report shall include details of the proposed remediation works and the quality assurance certificates to show that the works have been carried out in full in accordance with the approved methodology. Details of any post remediation sampling and analysis to show the site has reached the required clean-up criteria shall be included in the closure report together with the necessary documentation detailing what waste materials have been removed from the site.
 - f) Where applicable, a monitoring and maintenance scheme to include monitoring the long-term effectiveness of the proposed remediation over an agreed period of time, and the provision of reports on the same, must be prepared and approved in writing by the Local Planning Authority.

Following completion of the measures identified in that scheme, and when the remediation objectives have been achieved, reports that demonstrate the effectiveness of the monitoring and maintenance carried out must be produced and submitted to the Local Planning Authority.

Reason: To prevent harm to human health and pollution of the environment in accordance with Policy CS19 of the Gravesham Local Plan Core Strategy 2014.

4. No development shall take place until the applicant, or their agents or successors in title, has secured the implementation of an archaeological watching brief to be undertaken by an archaeologist approved by the Local Planning Authority so that groundworks are observed and items of interest and finds are recorded. The watching brief shall be in

accordance with a Written Scheme of Investigation, which has been submitted to and approved in writing by the Local Planning Authority.

Reason: To ensure that features of archaeological interest are properly examined and recorded in accordance with Policy CS20 of the Core Strategy 2014.

5. Notwithstanding the details submitted under this application, prior to any above ground works taking place, details and/or samples of all external facing materials to be used on the conversions hereby approved shall be submitted to and approved in writing by the Local Planning Authority. The development shall be implemented in accordance with the approved details.

Reason: In order to ensure an acceptable standard of development upon completion, in accordance with Policy CS19 of the Gravesham Local Plan Core Strategy 2014.

6. Prior to any ground works taking place, a plan shall be submitted to the Local Planning Authority for approval showing full details of hard landscaping and surface finishes for the development, including details of a porous access drive and car parking area, any patio areas, any screening or boundary treatment by walls, fences or other means and any steps. The scheme shall be constructed in accordance with the approved details and completed, in its entirety, prior to the first occupation of the dwellings hereby permitted.

Reason: In order to protect and enhance the appearance and character of the site and locality in accordance with Policy CS19 of the Gravesham Local Plan Core Strategy 2014.

7. Prior to any ground works taking place, a soft landscaping scheme, to include native species only, shall be submitted to and approved in writing by the Local Planning Authority, detailing the following:

1. Details of trees/hedgerow/shrubs to be retained and those to be removed.
2. Details of additional native tree, hedgerow and shrub planting within the site to include quantity, size and arrangements for aftercare.
3. Details of biodiversity enhancements.
4. Implementation programme.

Any identified trees or plants that die, are damaged, removed or become diseased within five years from the first occupation of the dwellings hereby permitted shall be replaced with a others of a similar size and species during the next available planting season. The landscaping works shall be carried out in accordance with the approved details before any part of the development is brought into use in accordance with the agreed implementation programme. The completed scheme shall be managed and/or maintained thereafter.

Reason: In the interests of visual amenity and to ensure a satisfactory standard of appearance upon the completion of the development and to ensure no net loss of biodiversity in accordance with Policies CS12 and CS19 of the Gravesham Local Plan Core Strategy 2014.

8. Prior to the first occupation of the dwelling, a detailed sensitive lighting plan for biodiversity shall be submitted to and approved in writing by the Local Planning Authority. The plan will show the type and locations of any external lighting, demonstrating that areas to be lit will not adversely impact biodiversity/ancient woodland. All external lighting will be installed in accordance with the specifications and locations set out in the plan and will be maintained thereafter.

Reason: In order to limit the impact of the lighting on wildlife and biodiversity with regard to Policy CS12 of the Gravesham Local Plan Core Strategy 2014.

9. Prior to any ground works taking place, a surface water drainage scheme for both the highway and the properties shall be submitted to and agreed in writing by the Local Planning Authority in consultation with Kent County Council. The approved scheme shall be undertaken in accordance with the approved details prior to the first use of the driveway and access in association with the dwellings hereby approved, and shall thereafter be maintained in perpetuity by the property owners.

Reason: To provide satisfactory drainage for the development and in order to mitigate surface water run-off which would contribute to the risk of surface water flooding during times of heavy rain in accordance with Policies CS11 and CS18 of the Gravesham Local Plan Core Strategy 2014.

10. No planting or boundary treatment located within two metres of the highway shall exceed 1m in height above carriageway level.

Reason: In the interests of pedestrian and highway safety and in line with Policy CS11 of the Gravesham Local Plan Core Strategy 2014.

INFORMATIVES:-

1 CODE OF PRACTICE FOR CONSTRUCTION/DEMOLITION SITES WITHIN THE BOROUGH OF GRAVESHAM

This Code of Practice relates to all building sites in Gravesham and is given to ensure best practice is achieved equally throughout the borough. All aspects of the code apply to every building site and will only be altered on an individual basis if there are found to be special circumstances on that particular site. Any amendment made will be in writing by an authorised officer of the Environmental Health Department. The following circumstances are given where consideration will be given to a variation in the Code of Practice:-

- a) Where occupiers of noise sensitive properties are unlikely to be affected by the works.
- b) Where the work cannot be carried out during the hours specified because of the requirements of another authority such as the emergency services, utilities, traffic management authorities etc.
- c) Where the site location is isolated or where the works are in a mainly commercial/industrial area with few residential properties.

In all the above cases the onus will be on the applicants to provide written justification as to why the code should be varied. When making such a statement the applicant must include the following information where appropriate:-

- i) Location, nature and duration of works.
- ii) Measured/predicted noise levels and background levels.
- iii) Measured/predicted vibration levels.
- iv) Proximity and numbers of residential properties.
- v) Evidence of public consultation/information to persons likely to be affected.
- vi) Written evidence from the appropriate authority (in instances where b) above applies).

In order for adequate consideration to be given by this Council to a request for deviation from the Code of Practice, any proposal must be provided in writing to the Environmental Health Services Manager at least fifteen working days prior to the works starting.

On developments where construction/demolition is undertaken on contaminated land, work will be required to be carried out in a way which will be specified within conditions of the site's planning approval.

The requirements of this Code of Practice should prevent unnecessary disturbance to nearby residents. In the event of a nuisance being caused due to work not being carried out in an appropriate way, the council may take enforcement action to resolve the situation.

Please note compliance with Health and Safety requirements arising from construction/ demolition work shall be given priority over this Code of Practice.

BURNING OF MATERIAL

It is expected that no burning of materials shall take place on a construction or demolition site. Where the contractor is of the opinion that this is unavoidable he shall make representations to the council for consideration. No burning will be allowed to take place without written authority from a suitably authorised officer of the council. Any burning so authorised will be subject to strict controls which will include, amongst other matters, the following:-

- o A strict control on the amount of material burnt at any one time.
- o Burning is carried out under the direct and continuous supervision of the person responsible for the site or a person authorised to act on his behalf.
- o All material shall be kept dry prior to being burnt.
- o The wind shall be positively blowing away from nearby residential or other sensitive buildings. Where this is not possible burning shall take place in still weather.

NOISE AND VIBRATION

Where sensitive premises are likely to be affected by noise and/or vibration, all works and ancillary operations which are audible at the site boundary, or at such other place as may be agreed with the council, shall be carried out only between the following hours (these to be known as normal working hours) : -

Monday - Friday 08:00 - 18:00

Saturdays 08:00 - 13:00

Sunday and Bank Holidays. No works audible at the site boundary or any other place agreed by the council.

In addition to the above times the contractor may use up to one hour before and up to one hour after normal working hours for start up and close down of activities. Examples of these activities would be:

- a) Day to day maintenance, checking, lubrication and cleaning/washing down of plant and machinery.
- b) Refuelling of plant and machinery (from on-site storage facilities only).
- c) Deliveries and unloading.
- d) Site inspections and safety checks, but excluding any works necessary to make the working zone and/or construction site safe (which are to be undertaken within normal working hours).
- e) Arrival and departure of workforce and staff at the construction site, but only in so far as the arrival and departure times provide for the minimum time necessary to undertake the tasks allowed by these start up/close down activities.
- f) Site meetings.
- g) Site clean up.

NB The start up and close down periods are not to be regarded as an extension to the normal working day.

Where the site boundary/entrance is located adjacent to noise sensitive areas it must be ensured as far as possible that vehicles do not arrive on site outside the times laid out above. Where this is found not to be possible, drivers of vehicles arriving at the site before it is open must not leave the vehicle's engine running or cause other excessive noise/pollution whilst they are waiting.

On the site itself, best practicable means as defined in section 72 of the Control of Pollution Act 1974 to reduce noise to a minimum shall be employed at all times.

Compliance with BS5228 Part 1:1997 'Noise control on Construction & Open sites' is expected as a minimum standard. This requires amongst other things that all plant and machinery in use shall be properly silenced, maintained and used in accordance with the manufacturer's instructions.

Criteria and procedures for vibration control are assessed using different parameters as follows:

- * Vibration Dose Values (VDVs) are used to protect the occupants and users of buildings from disturbance. (VDVs are defined in BS 6841 and their application is discussed in BS 6472).
- * Peak Component Particle Velocity is used to protect buildings from risk of physical damage. These are assessed in accordance with BS 7385.

Best Practicable means shall be used to control vibration levels so that the following Vibration Dose Values measured on a normally loaded floor in accordance with BS 6472:1994 are not routinely exceeded as a result of works.

Building Type	Period	VDV (ms ^{-1.75})
Residential Buildings, Educational Establishments, Offices and similar	Normal working hours	0.4
Commercial	Normal working hours	0.8

Best Practicable Means shall be used to control Peak Component Particle Velocity measured at the base of any building in accordance with BS 7385 does not routinely exceed a level of 10 mm/s.

In instances where complaints of vibration are received within any adjacent property then the contractor shall immediately take all measures necessary to demonstrate that the vibration levels are below the limits shown in the paragraphs above.

Where the results of any monitoring indicate non-compliance with the limits stated above, the contractor shall immediately change the method of working, and/or the plant being used. Prior to the work recommencing, the contractor shall satisfactorily demonstrate that the new arrangements satisfy the vibration limits.

DUST

Dust suppression techniques shall be used on site where significant quantities of spoil or fine aggregates are stored and/or where the site location is such that it is likely persons living in residential properties are going to be affected by wind blown dust.

Spoil temporarily placed on site shall be located as far away from sensitive properties as possible. The height of stored material shall be kept as low as is practical and water sprayed onto the surface of the piles shall be used as appropriate to keep the surface damp.

Where longer term storage of fine aggregates and other potentially dusty material is necessary, suitable storage facilities shall be used where practicable in order to screen these materials from the wind. This stored material shall be located so that it is as far away from sensitive properties as possible and measures to prevent wind blown dust shall be adopted. These shall include:-

- * keeping the height of stock piles as low as possible,
- * using water sprays as appropriate whilst minimising the production of excessive runoff,
- * minimising the re handling of dry construction materials and spoil,
- * keeping the loading drop heights to as low as possible,
- * where appropriate applying the surfaces of roads on site with water sprays as necessary and/or using wheel-washing facilities.
- * all materials transported to and from the site shall be conveyed by suitable vehicles in enclosed containers or using other adequate wind shielding measures such as sheeting.

The person responsible for the site shall keep on site a daily log book which will be available to visiting authorised officers and shall list the following:-

- * the conditions on site,
- * whether any wind blown dust was visibly coming off the site,
- * what control measures were carried out, and
- * what the results of these were.

COMMUNICATION

It shall be a matter of priority for a contact name and telephone number to be set up in order to enable ready two-way communication and contact with the council and local residents. In cases where work likely to cause a disturbance is to be carried on out of normal working hours, the phone line would be manned whilst the work is ongoing.

LIGHTING

Where security and/or site lighting is used, this shall be located and directed or screened so that it does not cause undue intrusion to adjacent occupied residential properties, or sensitive areas, or constitute a road hazard, and shall be chosen to limit light pollution effects such as "glow in the sky".

2 MAINS DRAINAGE

The foul sewage shall be removed by means of the mains drainage system and not by the use of non-mains sewerage systems, unless connection to the drainage system is not reasonably practicable. If foul sewage is to be removed using non-mains sewerage systems, a sewage treatment plant or septic tank system will be considered in preference to a cesspool. Such a system may require the prior consent of the Environment Agency under the terms of the Water Resources Act 1991. Applicants are therefore advised to discuss their requirements with the Environment Agency at the earliest opportunity. It should be ensured that the septic tank or cesspool is of adequate capacity to serve the proposed development and suitable access and hardstanding area shall be maintained to it on site.

3 KENT COUNTY COUNCIL HIGHWAYS AND TRANSPORTATION

It is the responsibility of the applicant to ensure, before the development hereby approved is commenced, that all necessary highway approvals and consents where required are obtained and that the limits of highway boundary are clearly established in order to avoid any enforcement action being taken by the Highway Authority.

Across the county there are pieces of land next to private homes and gardens that do not look like roads or pavements but are actually part of the road. This is called 'highway land'. Some of this land is owned by The Kent County Council (KCC) whilst some are owned by third party owners. Irrespective of the ownership, this land may have 'highway rights' over the topsoil.

Information about how to clarify the highway boundary can be found at <https://www.kent.gov.uk/roads-and-travel/what-we-look-after/highway-land/highway-boundary-enquiries>

The applicant must also ensure that the details shown on the approved plans agree in every aspect with those approved under such legislation and common law. It is therefore important for the applicant to contact KCC Highways and Transportation to progress the highways aspect of the works prior to commencement on site. This includes highways drainage issues and developing a suitable design solution before submitting details as required under the relevant condition under this application.

4 DEVIATION FROM APPROVED PLANS

It is possible that any proposed deviation from the approved plans could be classed as a 'material' change requiring a further application/permission. In the event that any change is proposed, applicants are advised to seek advice from the Local Planning Authority [as proceeding without the necessary permissions could nullify this permission].

5 NAMING & NUMBERING

As a result of the changes to this property, it appears that a change has to be made to the national property gazetteer. It is a legal requirement that a property or premises is registered.

The Naming and Numbering Certificate, when issued, will reduce location or delivery problems via Royal Mail or other carriers, and importantly for the Police, Ambulance, and Fire & Rescue services. Registration is also necessary to register to vote, for utility connections, and will avoid duplicate addresses.

The Naming and Numbering service is provided by the Borough Council. The on-line form is available at the Planning/House Numbering page of the council's web-site <http://www.gravesham.gov.uk/street-naming>. Please submit the application and the requisite fee in accordance with the guidance on the form.

6 BUILDING REGULATIONS AND PARTY WALL ACT

This decision DOES NOT imply any consent which may be required under the Building Regulations or under any other enactment or provision. Nor does it override any private rights which any person may have relating to the land affected by this decision, including the provisions of the Party Wall etc. Act 1996.

7 REASON FOR IMPOSITION OF PRE-COMMENCEMENT CONDITIONS

Pursuant to Articles 35 (1) and (2) of the Town and Country Planning (Development Management Procedure) (England) Order 2015, the Local Planning Authority is satisfied that the requirements of condition 3 and 4 (including the timing of compliance) are so fundamental to the development permitted that such details must be submitted prior to the works commencing on site. The reason for this is due to the potential harm to human health and pollution of the environment, and impact on archaeological evidence for the earlier history of the farmstead. Due to the importance attached to these details, it is reasonable and necessary to seek full approval in advance of works commencing

8 LIGHTING

Artificial lighting can cause a statutory nuisance under the Environmental Protection Act 1990. It is important that the applicants are advised not to install external lighting that illuminates anything other than the ground within the curtilage of the new property in order to assist in preventing a nuisance from occurring.

9 STATEMENT OF POSITIVE AND PROACTIVE APPROACH TO DECISION-MAKING

In accordance with Article 35 (2) of the Town and Country Planning (Development Management Procedure) (England) Order 2015 (as amended), and paragraph 38 of the National Planning Policy Framework (NPPF) 2023, the Local Planning Authority has approached the assessment and determination of this application in a positive and creative way and, where appropriate, has worked pro-actively with the applicant to secure a development that is sustainable and that improves the economic, social and environmental conditions of the area, and that is in accordance with the Development Plan for the area.

~~~~~  
**NOTIFICATION TO APPLICANT**

**APPEALS TO THE SECRETARY OF STATE**

- If you are aggrieved by the decision of your Local Planning Authority to refuse permission for the proposed development or to grant it subject to conditions, then you can appeal to the Secretary of State under Section 78 of the Town and Country Planning Act 1990.
- If this is a **householder application\*** which has been refused and you want to appeal against your Local Planning Authority's decision then you must do so within **12 weeks of the date of this notice**.
- For all other applications, refused or permitted, if you want to appeal against your Local Planning Authority's decision then you must do so within 6 months of the date of this notice.
- **For further information regarding Appeals and to make an application please click the relevant link:**  
<https://www.gov.uk/appeal-householder-planning-decision>  
<https://www.gov.uk/appeal-planning-decision>
- The Secretary of State can allow a longer period for giving notice of an appeal, but he will not normally be prepared to use this power unless there are special circumstances which excuse the delay in giving notice of appeal.
- The Secretary of State need not consider an appeal if it seems to him that the Local Planning Authority could not have granted planning permission for the proposed development or could not have granted it without the conditions they imposed, having regard to the statutory requirements, to the provisions of any development order and to any directions given under a development order.
- In practice, the Secretary of State does not refuse to consider appeals solely because the Local Planning Authority based their decision on a direction given by him.

#### **\*Householder applications**

These are:

- applications for planning permission for development of an existing dwellinghouse, or development within the curtilage of such a dwellinghouse for any purpose incidental to the enjoyment of the dwellinghouse, or
- an application for any consent, agreement or approval required by or under a planning permission, development order or local development order in relation to such development

but does **not** include –

- an application for change of use;
- an application to change the number of dwellings in a building.

#### **PURCHASE NOTICES**

If either the Local Planning Authority or the Secretary of State for the Environment refuses permission to develop land or grants it subject to conditions, the owner may claim that he/she can neither put the land to a reasonably beneficial use in its existing state nor can he/she render the land capable of a reasonably beneficial use by the carrying out of any development which has been or would be permitted.

In these circumstances, the owner may serve a purchase notice on the Council (District Council, London Borough Council or Common Council of the City of London) in whose area the land is situated. This notice will require the Council to purchase his interest in the land in accordance with the provisions of Part VI of the Town and Country Planning Act 1990.
