

Principle of control and protection:

Fully programmed and wired up ready to use inverters are the way we control the speed of our fans. Inverters are by far the best way to control the speed of fans, by using inverters you have the benefits of :

- High efficiency energy saving
- 0 to 100% controlling speed
- Fully protection of the fan

Speed control Data

Principle of control	Variable frequency Drive
Input voltage	1~ 200-240V
Input current	15 A
Output current	8 A
Output voltage	3~ 0-250V
Frequency	0 – 50 Hz
Enclosure class	IP20
