T4,T6 Hawthorn (Crataegus Monogyna)

New 1.15ha neutral grassland sown as wildflower meadow planted in field to the north - see drawing 4719/01

Neutral grassland: 1612m²

New mixed species hedge 51.2 Lm comprising of the following species and proportions:-

- Hawthorn (Crataegus Monogyna) 80%
- Field Maple (Acer Campestre) 10%
- Wild cherry (Prunus Avium) 10%

Cordwood from removed trees to form woodpile (deadwood habitat)

Bat roosting box fixed high up in gable of building

Bird nesting box

BIRD NESTING BOX

Wall mounted three chamber bird nesting box (FSC timber), installed 2.5–5 m above ground with clear flight path. Entrance holes 32 mm diameter. Installed under eaves/ sheltered facade. Fixed with stainless steel screws. Bird nesting box to be maintained annually outside breeding season.

Maintenance

- Inspection: Annual check outside breeding season (September–January)
- Cleaning: Remove old nesting material once per year
- Longevity: Expected lifespan 5–10 years depending on exposure

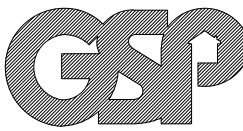

BAT ROOSTING BOX

Wall mounted crevice style bat roosting box (FSC timber), installed 3–5 m above ground, away from artificial lighting. Fixed with stainless steel screws.

Maintenance

- Bat boxes must not be opened or cleaned
- Longevity: 10+ years depending on exposure
- Monitoring: Visual checks only from ground level; no internal access
