Reasons for comment:	

### Comments:

Meopham is a semi-rural, farming community. This large area of farmland is essential for food security and the character of the area. Brownfield sites need to be identified within the Gravesham Borough before farmland used for food and a habitat for wildlife is turned into housing developments.

I am concerned about more residents and therefore cars in light of inadequate infrastructure. The A227 is an essential road for all residents in the area, including neighbouring villages and towns. With more frequency, it is becoming closed for emergencies (often water related) which puts the whole area at a standstill. Diversions are completely inadequate as the country lanes are single lanes that jam with lorries and busy two way traffic. More often, the A227 has temporary traffic lights, causing traffic and delays for miles. Children on school buses are more regularly late for school. Without any notice, temporary traffic lights are put up. For a 2 mile journey, it can take 40 minutes.

The bus service for 150 more households is inadequate. We have no morning peak time service, except for school buses. Buses are hourly and not always reliable. There are no cycle lanes or secure bike storage facilities at Meopham train station. There are no walking or cycle lanes to link Meopham with Istead Rise or Meopham to Borough Green. This forces residents to owning cars and driving in the area. Therefore putting more traffic on the only main road, the A227.

Also, development on this land will impact the character of the area, creating an urban sprawl. Wildlife will lose their natural habitats and our agriculture land used for food will be lost.

I do not support this planning application.

---

Kind regards
