Dear Alison

REFERENCE: 20250992

PROPOSED DEVELOPMENT: Outline application for the erection of up to 350 residential dwellings, public open space and associated works. Approval is sought for the principal means of vehicular access from Wrotham Road and all other matters are reserved.

LOCATION: Land At, Wrotham Road, Meopham, Gravesend Kent.

Thank you for your letter dated 12th November regarding the above planning application and the opportunity to comment on this development proposal. It is acknowledged that as an outline application only the matters of access are being considered at this stage and all other matters including layout are reserved for future consideration.

The development site accommodates Public Right of Way (PROW) NS 252, located within the south eastern corner of the site. You are also advised that Public Right of Way NS 173 is in close proximity to the south of the site and could also be affected by this development proposal. I enclose a copy of the Public Rights of Way network maps showing the line of the paths for your information. Therefore both footpaths must be retained and maintained and NS 252 should be appropriately incorporated into the development and clearly identified and sign posted.

The footpath surface must be reinstated or upgraded to a specification suitable for pedestrian use, ensuring it is safe, durable, and properly drained. Please advise the applicant to contact this office to discuss the proposed surface specification and any change in width of the Public Right of Way prior to any works being carried out.

The granting of planning permission confers no other permission or consent on the applicant. It is therefore important to advise the applicant that no works can be undertaken on a Public Right of Way without the express consent of the Highways Authority. In cases of doubt the applicant should be advised to contact this office before commencing any works that may affect the Public Right of Way. Should any temporary closures be required to ensure public safety then this office will deal on the basis that:

- The applicant pays for the administration costs.
- The duration of the closure is kept to a minimum.
- Alternative routes will be provided for the duration of the closure.
- A minimum of eight weeks' notice is required to process any temporary closures.

This means that the Public Right of Way must not be stopped up, diverted, obstructed (this includes any building materials or waste generated during any of the construction phases) or the surface disturbed. There must be no encroachment on the current width, at any time now or in future and no furniture or fixtures may be erected on or across Public Rights of Way without consent.

To ensure Public Rights of Way NS 252 and NS 173 are safeguarded, it is recommended that the following conditions are applied to any approval of planning permission;

- Prior to the commencement of development, a Public Rights of Way Management Scheme shall be submitted to and approved by the Local Planning Authority and Highway Authority. The scheme shall include provision for:
 - i. the design of access and public rights of way routes and their surfacing, widths, gradients, landscaping and structures
 - ii. any proposals for diversion and closure of public rights of way and alternative route provision

Reason: In the interests of the amenity and safety of the public

- No excavation or tipping of surface material or temporary storage of soils, waste, materials, plant or equipment or any other such materials shall take place on the Public Rights of Way NS 252 and NS 173 or within a minimum distance of 5 metres.

Reason: To prevent obstruction of the Public Rights of Way and protect users of the Public Rights of Way.

I trust this is of assistance to you.

Yours sincerely

Julian Ling
