

20231050 Grange Travel Coach Hire Limited

KCC Heritage 15 November 2023

Thank you for consulting us on this retrospective application.

I understand that the shed was built in early 2023 and without any archaeological mitigation. It would be helpful to know from the applicant if any photographs were taken during the ground preparation and construction which could help understand whether any archaeological features (e.g. associated with the former canal and lock gates, railways lines etc..) was present and/or may exist at the site.

Thank you for any advice.

Yours sincerely
