

Email from agent 05.03.2026 - Initial built monument response to KCC Heritage comments

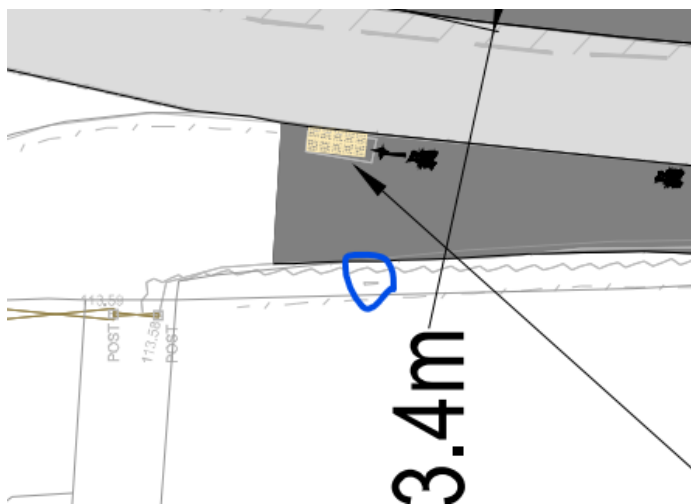

We have undertaken some additional research on the highlighted built monuments (the milestone and George VI pillar box) which are located within the highway ownership.

I have included a series of images/plan extracts below that identify the two features and demonstrate that there will be no impact through the proposed highway improvements:

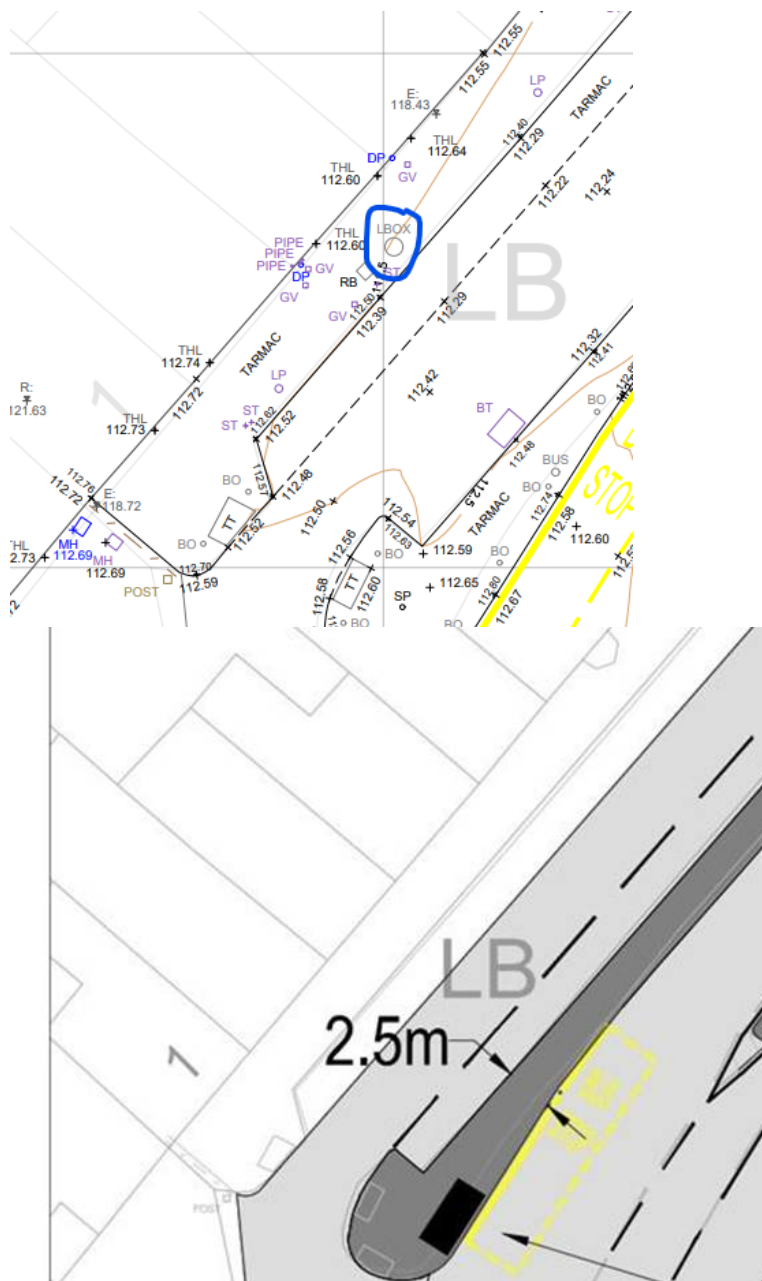

See the monument on the left, at the forefront of this image, and the letterbox in front of the parade of shops, on the right hand side.

See the location of the monument (circled blue) as shown on the Proposed Site Access With Visibility Spays plan (ref: T25512-001 Rev F), which demonstrates that it falls outside the scope of improvement works.

See the location of the postbox (circled blue) for comparison with the Proposed Site Access With Visibility Spays plan (ref: T25512-001 Rev F) which demonstrates that it falls outside the scope of improvement works.

I trust this addresses the concerns raised but do let me know if you have any questions.
