Grid9 Air Brick  
£135.00 – £145.00

A very versatile large 9×9 inch air brick used along with the single double sized GRID6 as the original vent in millions of late Victorian common in period English mansions, halls and stately homes as well as industrial Victorian properties. Relatively small hole size eliminates expense of a lower than average free area.

9 x 9 Square Hole Air Brick with choice of finishes, bare or painted to allow to rust for a natural finish commensurate with red brick or customers to paint to their own paint scheme or purchase painted red brick properties or rendered properties.

Painted vents use two part epoxy black gloss top coat which is a decorative finish, like all painted cast iron products it will require time, especially if situated on an exposed wall. Repainting can be positioned in the sunlight, or chipped or exposed to salt air. The time, in exposed conditions it is likely to dull to a satin sheen fair for the paint finish the cast iron grille will last for many decades with

For company orders we can supply air bricks in any RAL colour, painted with 3 part epoxy 2 part gloss or matt top coat at an additional cost. email item number, quantity and RAL number for a proforma for

This imperial air brick can be used with duct tape (there is no ME the fitting requires some degree of patience) the metric plastic Ry wall sleeves available separately on this website item [CAVHEXT9C](#)

It isn't possible to install flymesh at the back of this air brick as they become dislodged or will block without the ability to clean it. If fly gaining entrance to the property via the vents and are a nuisance air brick with removable front and integral mesh may be a more suitable. Please note mesh cannot legally be used (UK – current GAS Safe regulations apply) vents where the vents are required to feed a combustion appliance where there is a combustion appliance.

Although not as efficient as the MAX9 cast iron air brick, the GRID period properties requiring a little less ventilation. It has been used in properties and most noticeably in the National Monument of Nelson's Victory
