

Property: 7 Downs Wood , Vigo, DA13 0SQ

Require a mature oak tree height to be cropped back to reduce the risk of danger of branches breaking causing a health and safety issue and to cut back branches that have died back and starting to rot.

The tree is on the rear boundary to 7 Downswood and there is a concern of branches breaking and falling into the neighbouring rear garden which have young children that frequently play at the rear to their garden adjacent to the tree.

The tree is an English Oak approximately 25 to 30m in height.

The proposal is to keep the shape of the crown but reduce the height by cutting back the branches by 2 or 3m.

The works will be carried out by a competent Tree surgeon like Lumber Zac from Rochester.
