Reasons for comment:

Comments:	Connections - Having no direct link to New Barn and only connecting the new houses to Istead is just the start of how ridiculous this plan is. The amount of traffic on Downs road is already vast and adding hundreds more houses only directed with roads to Istead will only cause this to increase creating more accidents, traffic and overcrowding. Risk of Flooding - Building & paving over arable land will increase the risk of flooding. Being in a valley, Downs Road has been susceptible to flooding. Reports state that there use to be an underground river at the bottom of the valley. Climate change has resulted in far more extreme weather events & I am concerned that even with new drainage this will be overwhelmed during periods of heavy sustained rain or torrential rain for anything more than a few mins. GP Surgery - Despite claims to the contrary by the developer, there is no spare capacity at Istead Rise Surgery. The same is true for Meopham & Longfield. The reviews on Istead Rise Surgery on Trust Pilot are poor, mainly due to the difficulties experienced trying to get an appointment. We have an ageing population & an increase in people with health conditions due to a number of factors including environmental. Pressure on the surgery will therefore continue to grow & an additional 400 or so patients will make this intolerable. Traffic - Public transport links to Istead Rise are poor. There are no train stations within a walkable distance & the bus service is limited & unreliable. Due to the hilly nature of Istead, many people use their cars even for short journeys such as
-----------	---

visiting the local shops. The developer has made provision for almost 400 car parking spaces. When you factor in deliveries to these new homes e.g. Amazon, there would be a very significant increase in traffic resulting in increased pollution & danger to pedestrians & cyclists. Istead is used as a cut through when there is heavy congestion on the surrounding roads such as the A227 & A2. Old Downs Road is currently heavily used by walkers, runners & cyclist making their way to the Cyclopark. Few cars use this road at present. It is single track without a pavement. I fear that the introduction of circa 400 car users & resultant traffic congestion in the area will lead drivers to use Old Downs Road to cut through to Northfleet which will make this route unsafe for walkers, runners & cyclists.

School - Aside from the lack of spaces at Istead Rise Primary, it is beyond question that getting to & from school will become far more hazardous due to only entrance to & from the new estate being right next to the school gates. There will be a large increase in cars at drop off & pick up times in particular, resulting in very few safe crossing points. This is already an issue today & will get significantly worse. Pollution levels will rise & air quality diminish which we know has a very adverse effect on health with the very young being particularly at risk of becoming asthmatic.

Kind regards
