██████████ Vale Road Northfleet DA118DD 5 September 2024

I have already made my objection to the proposed telecommunications installation in Vale Road when the first application was made several months ago. I said at the time my objection was futile as the council has already made the decision before it ever gets to the residents being made aware of the installation.

The residents all signed a petition against this yet still our objections get ignored.

I will state again that it is a dangerous place to erect a communications mast as it is on the brow of a dangerous blind bend and as any form of technology needs to be serviced and as we know often goes wrong will need to have service vehicles parked on the hill and cause more problems for the traffic crossing the railway bridge.

A wasted effort I know as you're going to install the thing anyway, but if an accident happens because of it I'll be the first to produce this email as evidence of such short sighted planning.

Why can't this installation be sighted in Springhead Road on the other side of the country park where there are no houses and would be a less dangerous site.
