

Hi Kelly

Please see below comments, and attachments. If there is anything else you need, please let me know.

Dear Sarah

Dear Sarah

Thank you for your emails. I have been working to progress the application and I have some queries that I would like to bring to your attention please.

The application details specify aluminium flush casement windows (style 33). Can you please clarify which manufacturer/provide a catalogue/specification?

The window system is ACW 81. I have attached the brochure along with this email

Also, there are a number of different proposed windows (including rooflights) and doors. Please provide the relevant specifications for each?

Front door is a timber door

Sliding doors <https://www.svsframetech.co.uk/sliding-doors>

For the sky light <https://www.lbroofwindows.co.uk/roof-windows/aurora-roof-windows/aurora-pvc-centre-pivot-roof-window-b700/>

What material would the black cast iron effect guttering and the black wood grain fascia and soffits be made from? The guttering and fascia and soffit shall be made from plastic

Please provide a colour specification (usually a RAL colour reference number) for the render and specify what type of render is proposed? The type of render shall be 'silicone K-Render ' in a colour called Champagne <https://www.directbuildingproducts.co.uk/colour-swatches/>

I would be grateful if you would please respond to this email by 28 September 2023.

Kind regards

Sarah
