Reasons for comment:

| | |
|-----------|--|
| Comments: | <p>In my opinion, this development shows there is inconsistency with the green belt purposes and local plans.</p> <p>The proposed development fundamentally undermines the purposes of Green belt and goes against the key measures of Green Belt Status. Such as:</p> <p>Preventing urban sprawl. This development would cause the unrestricted sprawl of a built-up area.</p> <p>Safeguarding the countryside: This development represents an inappropriate encroachment into the countryside and will harm the special setting and character of our historic village.</p> <p>There is insufficient infrastructure and services to enable proper and adequate provision for the mass influx of population.</p> <p>There is insufficient Social infrastructure, such as medical, schooling and other services in which to cope with and serve additional large scale population.</p> <p>The development would cause harm to the environment in an irreversible way, and cause loss of habitats for wildlife as well as the loss of ancient trees, woodland and hedgerows.</p> |
