Reasons for comment:

Comments:	<p>I am objecting because this development is on green land that should be used for growing food. Green land should never be built on all the time we have brown field land to build on. It is important to save as much green land as possible to combat pollution and provide food for the nation. Due to the lack of public transport, to run a house and a family, each household will need at least two cars and this means we have an extra 700 cars plus visitors and delivery drivers trying to get in and out of Meopham and cutting through Sole Street Village. This area is already gridlocked during rush hour and school drop off/pick up times and very close to an accident black spot at the parade of shops. I live in the village of Sole Street, there are times we cannot get out of our village to the doctor's surgery or to get to work due to Meopham being gridlocked. I am also worried for Sole Street villagers. In large parts of Sole Street we have no pavement to walk on and no street lights. All the extra cars will put Sole Street villagers at a higher risk of being knocked over by a vehicle and either being severely injured or killed. Please remember, traffic will also go up when the Lower Thames Crossing is built. Meopham and Sole Street are already major rat runs and soon we will be a major rat run for the LTC. The A227 is, is a very narrow road near the George pub, with cars parked either side of it, and with the extra traffic, it will just make it even harder to get through to our Meopham Medical Surgery. Also I am not convinced our local Meopham Medical Practice can take the extra residents on as patients.</p>
