Planning Application ref 20250993

I strongly object to this planning application for new development in Meopham.

It will mean even more vehicles onto crowded and dangerous local roads and the A227, which already cannot cope at peak times.

The proposed land is productive farm land, much needed by the country to increase home food production.

An increased population will cause overcrowding on local transport systems, including an almost non-existent bus service. Additional strains will also be put upon the already overstretched N H S and the local G P services.
