| Comments: | This proposed development fundamentally undermines the purposes of the Green Belt, representing an inappropriate encroachment into the countryside and leading to increasing sprawl in our countryside areas. This proposed development is in an attractive rural part of Meopham which has considerable biodiversity value and is an important part of the character of the area. It is therefore potentially harmful to the setting and special character of Meopham. Further, we as local residents feel that the development represents a threat to already overstretched local infrastructure, including a significant increase in traffic congestion, and further pressure on already inadequate public transport provision. The position of the proposed development next to a school also risks the safety of parent and children pedestrians. Concerns have also been raised that there is insufficient capacity in schools, healthcare facilities (e.g., GP surgeries), and other public services to support the proposed new homes. |

Kind regards
