Commenter Type:	Member of the Public
Stance:	Customer objects to the Planning Application

Reasons for comment:

Comments:	I object to this proposal due to the following reasons: *Local Infrastructure and services cannot support this development *Local GP surgeries cannot support the additional residents this would create, they are already at their limit. This has already been stated in regards to other planning proposals also but appears to be repeatedly not taken into consideration/ignored deliberately *Flooding concerns with the land *Loss of mass area of our local green spaces *Developments should be on brown field sites and not on any of our green local spaces, these should be preserved *Wildlife for this area needs to be protected *Additional local pollution concerns with this level of housing/additonal cars/etc which will impact on anyone with health conditions that are exasperated by this *Local roads will not be able to handle the additional traffic this would create I have a huge concern particularly with the recent news of South East Water stating they do not have capacity to supply drinking water to match the new housing targets already planned for Tonbridge and Malling areas, suggesting to add even more houses in the local area seems quite ridiculous if the services simply do not have the capacity to match the housing numbers proposed
-----------	--

Kind regards
