

6. Details of Proposal

To remove our existing fence and low hedge bordering 404, remove slabs of garden footpath to front steps and install concrete parking area with hardcore base. Front fence to be removed to provide access.

Access will be by using adjoining driveways.

I request that the council will agree to a case for easement following previous visit by Mr Davis. In 2020 Mr Sahota (22A Chalky Bank) applied for redevelopment of our former garage at the rear of our property. A Council officer Mr Davis visited our property and stated in his report that should we make a future application for parking provision in the front of our property, then to preserve the environment (tree on pavement) a case for easement of vehicular access could be made by using adjoining driveways.

Dimensions of area 19ft from front gate and 18ft across from 404 boundary towards 400.

Property width is 21'6". Have shown metric conversions on plan.

Work provisionally to be carried out by Hooper & Sons.
