Reasons for comment:

Comments:	Dear Madam/Sir, I am the [REDACTED] at 8 The Drive and am writing in support of this application. My [REDACTED] live living in the property, which has been their home since 1982 and are keen to future-proof it, in order that it continues to be a comfortable home for many years to come. It's my firm belief that the planning department and/or committee should approve this application for the following reasons: 1) The garage conversion will improve the utility of the property and maximise the living space available. As has been detailed in the application, the garage currently in place is smaller than KCC and GBC standards and therefore of no practical use other than as storage. 2) The installation of a ground floor w/c within a space currently used as a cupboard brings the house up to modern standards and increases its utility. 3) As outlined in the drawings, the design of the conversion is sympathetic to the rest of the house, with a large external window in keeping with others to the front of the property. 4) Several neighbouring houses, including the direct next-door neighbours at numbers [REDACTED] have similar garage conversions, establishing a clear precedent for this type of alteration.
-----------	---

5) As the garage is too small to accommodate modern vehicles, it is not currently used for parking. This demonstrates that there remains ample parking available to 8 The Drive. The residents will continue to park on their driveway and directly outside the property.

It's my belief that the above points should be enough to ensure that this conversion is approved by the council.

Kind regards
