Comments Details

Commenter Type:	Neighbour
Stance:	Customer objects to the Planning Application
Reasons for comment:	
Comments:	I am very concerned about lithium batteries being stored in large quantities, I have worked within the haulage of lithium batteries and witnessed them self igniting and not being able to be extinguished. This type of battery gives off a ferocious heat and explode and can reignite after seemingly put out. I live just across the main road to where the proposed sites will be and consider this highly dangerous.

Kind regards
