Reasons for comment:

Comments:	I am writing to object to planning application 202607. I moved to Meopham 24 years ago from London and part of the reason for doing so was so that my young family could experience and appreciate the beauty of nature and green spaces of the countryside. Subsequently since that time the greenbelt in the South East of England has consistently been targeted by developers in pursuit of new homes and ultimately fast profit. Simultaneously Government have been trying to encourage relocation to the nations and regions outside of London and the South East, so why is there still a relentless pursuit to build homes in this area and also on Greenbelt land too? Examples of these in recent times are Ebbsfleet (15,000 homes), Eastern Quarry/Whitecliffe and land at Coldharbour Road (400 homes). Gravesham still has many areas of Brown Belt land ripe for development including areas of such land at Gravesend Hospital and the Tollgate Hotel both of which have been derelict for years now. My concerns centre specifically for land in Meopham being an area of natural outstanding beauty, which if developed will be lost forever. This includes protecting natural habitats and ecosystems but more importantly building additional developments will be putting immense pressure on local amenities such as medical services, schools, water and traffic which are already at maximum capacity.
