

Dear Sir or Madam,

Email address: as above,

We would like to make this objection to the above Planning Application, on behalf of both my wife, & myself, therefore 2 objections in one email.

We object to this proposal on the grounds of the total infrastructure of our Village being overloaded already.. Between 14th February,2016 to present date I have recorded 119 Power Cuts; this is not an accurate number as I have missed several. There is already a severe safety issue with the volume of traffic on School Lane, especially where HGV's are concerned, & any increase in numbers would be unacceptable. The risk of water services being rationed is also on the cards, no Doctors Surgery, apart from the pollution aspect, & deterioration of "Quality Of Life" for the existing occupants. Just because a vacant plot exists does not mean it is acceptable to build on it.
