Reasons for comment:

Comments:	<p>The proposal is unacceptable for the following reasons;</p> <p>There will be potentially over 200 cars and deliveries and services, adding to the already busy routes through the village and exacerbating the impossible parking as residents try to access local amenities</p> <p>The Helen Allison school is SEN, with vulnerable students and the impact on them could be absolutely devastating</p> <p>The road for main access is narrow, near that school and the primary school and on road parking is already overcrowded, making it a potential accident blackspot</p> <p>There is already damage to the fencing outside the primary school and the increase in service vehicles will make this area more vulnerable also</p> <p>High grade farm/agricultural land which is vital for the food production</p> <p>The land is green belt and should be preserved for future generations</p> <p>Additional traffic through and already very busy road is only going to cause more congestion and increase accident risks</p> <p>Any road works would cause diversions that already are inadequate for the current traffic usage</p> <p>Peak services into London via train are already overcrowded and cannot cope with increased capacity</p> <p>The schools and doctors are already oversubscribed and cannot cope with an increase in local population</p>
-----------	--

Kind regards
