## Comments Details

Commenter Type:	Member of the Public
Stance:	Customer objects to the Planning Application

Reasons for comment:

Comments:	<p>The proposal is unacceptable for the following reasons;</p> <p>There will be potentially over 700 cars and deliveries and services, adding to the already busy routes through the village and exacerbating the impossible parking as residents try to access local amenities</p> <p>The road for main access is already busy as it's close to shops and amenities, the parade is already an accident blackspot</p> <p>The start and end of school/nursery is already congested and causes traffic frustration and delays and the proposal would only serve to increase the problem</p> <p>High grade farm/agricultural land which is vital for the food production</p> <p>The land is green belt and should be preserved for future generations</p> <p>Additional traffic through and already very busy road is only going to cause more congestion and increase accident risks</p> <p>Any road works would cause diversions that already are inadequate for the current traffic usage</p> <p>Peak services into London via train are already overcrowded and cannot cope with increased capacity</p> <p>The schools and doctors are already oversubscribed and cannot cope with an increase in local population</p>
-----------	---

Kind regards
