

Basant, White Post Lane, Sole Street, Cobham, Kent, DA13 9AX

T1 Ash, Removal of major dead wood.

T2 Ash, approx 15-16m tall, 8m asymmetrical spread with westerly bias.

Reduce height and spread by up to 3m, removing growth overhanging conservatory, leaving an approximate height of 12-13m and a residual crown spread of approx 5.0m, to leave crown approximately the same size and shape as previous pruning.

The subject tree has historically been pruned to alleviate debris and detritus fall onto property. The suggested works will continue this regular maintenance program and maintain it at a size more suitable for the location.
