Singlewell Road Gravesend DA11 7PW

1.9.26

I am a neighbour of the applicant and would like to express my support for the application for the retention of the rear outbuilding.

I am familiar with the property and the previous outbuilding, including the issues with the former structure, and I have seen the improvements both internally and externally. In my view, the current outbuilding represents a significant improvement on what was previously there.

The replacement is of a much better standard and has considerably improved the appearance and condition of this part of the property. It provides a practical and usable space for the applicant and, externally, presents a much neater and more attractive appearance within the surrounding area.

Importantly, as a neighbouring resident, I do not consider the outbuilding to have caused any detrimental impact on neighbouring residential amenity. In my experience, it has instead resulted in a positive improvement to the property and its immediate surroundings.

Having been familiar with both the previous structure and the completed outbuilding, I believe its retention is a positive and appropriate improvement to the property, and I am very happy to support the application.
